Systems Overview
made in the u.s.a.

formulated in switzerland

The Arbonne Difference …
Premium Skin Care Products

Arbonne premium skin care products are formulated in Switzerland at the Arbonne Institute of Research and Development (AIRD™) and made in the U.S.A.

Our proprietary formulas are:

- • Botanically-based: A proprietary blending of science and nature, based on herbal and botanical principles.
- • pH correct: Skin care pH of 5.5 ensures maximum benefit.
- • Hypoallergenic: Voluntary human testing meets hypoallergenic substantiation claim criteria.
- • Dermatologist tested: Voluntary human tests done under the watchful eye of an independent dermatologist.
- • Never tested on animals: Substantiation and safety testing is performed at independent laboratories on voluntary human panels.
- • Formulated without animal products or by-products: Plants and herbs together with science and technology offer superior benefits.
- • Formulated without mineral oil: Occlusive oil can interfere with skin functions as well as advanced delivery systems.
- • Formulated without dyes or chemical fragrances: Dyes and fragrances are known irritants and can cause allergic reactions.*

*From time to time, Arbonne will incorporate fragrance in specialty bath and body skin care products. This inclusion will be clearly marked as fragrance on the ingredient list. Keep in mind, all products must pass voluntary Repeat Insult Patch Tests to ensure safety to the consumer prior to introduction.
